

(A) CONVOLUTION (YOLO26n): STRICTLY LOCAL

Localized Heatmap

$\nabla_W \mathcal{L}_{cls}$ Local Flow

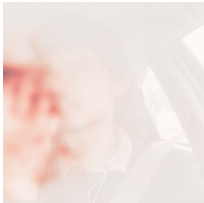

RULE: SAMPLE FOR CONVOLUTIONS (0.0% Curation Gain)
Local sliding window saturates early; random sampling sufficient.

(B) ATTENTION (YOLO12n): GLOBAL AREA-SPANNING

Area-Spanning Heatmap

$\nabla_{QK} \mathcal{L}_{cls}$ Dense Flow

RULE: CURATE FOR ATTENTION (-65.2% FP Reduction)
Global cross-area bindings require high-entropy hard negatives.
